Gladiolus of Quality

SPRING

Of 1946

DESCRIPTIVE LIST OF QUALITY BULBS

GLADVALE GARDENS

DR. J. A. CLAUSEN, PROP. : WALNUT, ILLINOIS

PLEASE READ BEFORE ORDERING

Another year has rolled around and we are pleased to report that our 1945 sales on bulbs were more than satisfactory. We can only regret that our supply was not large enough to supply demands.

We again urge our customers to order early while our stocks are complete.

We highly appreciate your patronage in past seasons and feel sure that our crop for 1946 sales is of the best quality yet offered. By planting yearly on new ground, using New Improved Ceresan as a dip and by rigid culling of defective bulbs, we are able to maintain an enviable quality of bulbs.

RETAIL ORDERS PREPAID

Bulbs from this list will be prepaid anywhere in the United States on orders of \$2.00 or more. If less than that amount is ordered at one time add 20 cents to help pay for packing and postage. Terms are cash in full with order.

CAUTION

Don't risk sending currency in payment of your orders. If you do so, it must be at your own risk. Last season several customers wrote me that they had sent for bulbs but had received no bulbs and no reply. In each case they had put cash in the envelope with order. So please send a bank draft, express money order or postoffice order.

DISCLAIMER

We use every precaution possible to grow high quality stock and keep varieties true to name. However, we will not hold ourselves responsible for crop grown, because the conditions of planting, tillage and general care are not within our control. However, if bulbs are unsatisfactory upon receipt, they may be returned for refund, and if on blossoming they do not prove true to name we will replace with same or other variety of equal value.

We have discontinued some varieties that have appeared in previous catalogs but have added many of the more recent introductions of same color and superior qualities. These newer varieties will hold many pleasant surprises for you when you see them bloom.

TIME OF SHIPMENT

When ordering please specify when you wish bulbs shipped. We can winter pack and ship safely most any time but unless you have a cool airy storage they are better off in our own storage until near planting time.

It helps the customer and the shipper if a few second choice items are listed, as we are bound to sell out on some varieties sooner than others. If we are out of large size ordered, we usually send medium (also a blooming size) and add extra count to balance.

DISCOUNTS

We have sometimes offered cash or bulb discounts. Instead of discounts this season we shall add overcount and extras of other varieties in proportion to earliness and size of order. We are sure you will be pleased by our liberal treatment of orders.

SIZES

Large bulbs contain No. 1 and No. 2 or $1\frac{1}{4}$ inch and up.

Medium bulbs contain No. 3 and No. 4 or $\frac{3}{4}$ to $1\frac{1}{4}$ inch.

Small bulbs contain No. 5 and No. 6 or $\frac{3}{8}$ to $\frac{3}{4}$ inch.

QUANTITY PRICES

If interested in quantities of 25 or more of same variety and size, write for our quantity list. We have stock enough of some varieties to sell by the hundred and of a few varieties by the thousand.

INFORMATION

We receive many inquiries for information on various phases of glad culture. We are always pleased to supply such needed information when we know the answer. However, to save time and correspondence when possible we have had mimeographed copies made of a 3,000-word article of our own on gladioli growing which first appeared in the I. G. S. Quarterly, and was later copied in the "Michigan Horticulturist." A copy of this article is available to our customers for 15 cents to cover cost of paper, typing and postage.

- ACCA LAURENTIA**—Soft orange, deeper throat. Wonderful for cutting. Large, 15c; Medium, 10c; Bulblets, 25 for 40c.

GLADIOLI CULTURE IN A NUTSHELL

1. **PLANTING TIME**—April 25 to June 25.
2. **SITE**—In full sunshine, well drained soil. Keep away from buildings, trees and shrubbery.
3. **PLANTING DEPTH**—Bulblets, 2 inches; small size, 3 inches; medium, 3 to 4 inches; large, 4 to 6 inches. Rows, 2 to 3 feet apart.
4. In cutting flowers, leave at least 4 leaves intact.
5. **LYSOL DIP**—1 tablespoon lysol; 1 gallon water. Soak bulbs 4 to 6 hours immediately before planting.
6. **THRIP SPRAY**—2 ozs. tartar emetic; 2 ozs. brown sugar or corn syrup; 3 gallons water. Mix well. Spray weekly after third leaf of foliage appears until bloom starts.
7. Dig bulbs about 6 weeks after varieties are done blooming, usually in October. Store in coolest part of basement after bulbs have been dried thoroughly in shade.
